

Experiment No:9 Write a program that inputs a text file. The program should print all of the unique words in the file in alphabetical order.

In [10]: `#Read`

```
In [13]: file = open("Exp9.txt", "r")
content = file.read()
print(content)
file.close()
```

Hello Prachi
How Are you?
I am Student of Dkte College.

```
In [15]: with open("Exp9.txt", "w") as file:
        file.write("Hello, Python!\n")
        file.write("File handling is easy with Python.")
print("File written successfully")
```

File written successfully

```
In [16]: file = open("Exp9.txt", "r")
content = file.read()
print(content)
file.close()
```

Hello, Python!
File handling is easy with Python.

```
In [17]: f = open("Exp9.txt", "r")
print("Filename:", f.name)
print("Mode:", f.mode)
print("Is Closed?", f.closed)
f.close()
print("Is Closed?", f.closed)
```

Filename: Exp9.txt
Mode: r
Is Closed? False
Is Closed? True

```
In [18]: f = open(r"D:\My File\Hello World.txt", "r")
print(f.read())
f.close()
```

Hello World
Python is easy as compare to C language

In [19]: `#append`

```
In [20]: f = open(r"D:\My File\Hello World.txt", "a")
f.write("\nThis is new content added using append mode.")
f.close()

print("Content appended successfully")
```

Content appended successfully
